## Certification & Courses

### MICROSOFT AZURE

[Azure Fundamentals \(AZ-900\)](#) - ([credly validation](#)),  
[Developer Associate \(AZ-204\)](#) - ([credly validation](#))

### AWS

Cloud Practitioner

### Cutshort

[React-Native \(Advance\)](#)-([cutshort validation](#))  
[Kotlin \(Basics\)](#)-([cutshort validation](#))

### Udemy

[Python](#) Bootcamp

## Work Projects:

**Projects: Cleekart** - March 2023 to Present  
Home interior private limited.

**Website:** <https://www.cleekart.in>

- **React** - JavaScript, HTML, CSS, Bootstrap 5.3  
Google Maps API, oAuth API, Firebase - Hosting, Authentication, Firebase storage, Google Analytics, GCP - Google Cloud (API & Services, Cloud Storage)

**Android & iOS** - Application development is in pipeline.

## Personal Project:

### Projects: Resume

Profile page with my skills, blogs & achievements.

**Website:** <https://www.kaligotla.in>

- **React** - JavaScript, HTML, CSS, Bootstrap 5.3  
oAuth API, Firebase - Hosting, Authentication, Firebase storage, Google Analytics.

**Android:** <https://play.google.com/store/apps/details?id=in.kaligotla.deepak>

## Academic Projects:

**Orphanslife (Orphanage Management System)** - Nov 2022 to Present

Developed the application and all its functionalities in multiple technologies and frameworks.

**Github :** <https://github.com/deepakkaligotla/orphanslife>

**Site:** <http://orphanslife.in/home> (Personal Project)

**PlayStore:** <https://play.google.com/store/apps/details?id=com.kaligotla.oms> (Personal Project)

**Platforms :** Website (React), Android (Java), Android (Kotlin), iOS (Swift), Hybrid(React-Native & Flutter), Backend (NodeJs), Cloud (AWS, Azure)

**Architectures:** MVVM, Microservices, MVC, Clean

### Technologies used:

**Languages** - Java, Kotlin, JavaScript, Dart, Swift, HTML, CSS

**Database** - MySQL, MongoDB

**Cloud** - AWS

**Cloud Services** - EC2, RDS, S3, Amplify.

**Backend** - NodeJs - Microservices API calls

**Platforms** - Mobile Application & Website

**Libraries** - Retrofit (Android), Alamofire (Xcode), Figma (m3 Material UI), Crypto, JSON-WebToken, JsPDF, NodeMailer, Morgan, Multer, Formidable, BootStrap, JQuery, Stripe

**Domain** - GoDaddy

## Key Roles & Responsibilities

- A valued team member with strong written communication, verbal communication skills, problem solving skills, customer service and interpersonal skills.
- A self-driven, goal oriented, customer focused software professional with proven ability to successfully work in all phases of Software development lifecycle -  
**Planning & Research, assessing of technical feasibility, creating wireframe & prototypes, UI/UX & backend development**, creating test units and **input validations**, testing app on different devices, **secure backend server deployment**, App launch/publish, **Enhancing app features as per requirements**.
- Good understanding of **Android & iOS UI guidelines**, hands on experience with **Flutter, React-native** and knowledge on native & Cross platform mobile development frameworks
- Understanding in designing mobile apps on **MVVM**, Clean, **MVC & Microservices models**
- Hands on experience in **AWS Services** - EC2, Route 53, RDS, S3, Amplify & **Azure Services** - App Service, SQL Server, Cosmos DB, Storage Account, Application Insights
- Understanding on securing and maintaining **Docker** inside **Kubernetes**
- Have used 3rd party Node Libraries like - **Retrofit, Alamofire, NodeMailer, JsPDF, Morgan, Crypto, Multer, JWT, Stripe** and more
- Well-versed in Java, JS, XML & JSON and skilled in developing **API's** for middleware Framework modules for mobiles platforms using **Node-JavaScript & Microservices Architecture**
- Good understanding in Data Structures, Multithreading, Collections, Exception Handling.
- Hands on experience of working on Android platform and customising it as per requirements.
- Experience of using version control and bug reporting tools like **Git** and **Jenkins CI/CD**.
- Hands on experience and knowledge in **Appium** and **Katalon** open source testing tools
- Expertise in troubleshooting and debugging applications
- **ExoPlayer** (Android), **AVPlayer** (iOS), Chewie (Dart), DRM, HLS, DASH, RTP, SRT
